

## Some of our Partners and Networks

**RRC.AP**  
Regional Resource Centre for  
Asia and the Pacific

## Air Pollution Cluster

The Regional Resource Centre for Asia and the Pacific (RRC.AP) is an outreach centre of the Asian Institute of Technology (AIT) that assists countries to advance their sustainable development goals by providing capacity building, knowledge and information sharing, policy advice, and research in the thematic areas of Air Pollution, Climate Change, and Waste and Resource Management.

Air Pollution Cluster (APC) is committed to finding the best solutions to combat air pollution and related environmental problems for a clean and sustainable environment in the Asian region. We contribute to various initiatives aimed at improving air quality in the region.

## Challenges

The economic growth experienced in the Asian region over recent decades has led to increased emissions of air pollutants due to rapid industrialization, motorization, and urbanization, including constructions, open burning of waste and agricultural residues, land use changes, etc. Emission of air pollutants from these activities has resulted in an alarming deterioration of air quality across the region, putting human health at risk.

## Solutions

The effective and efficient control measures from all stakeholders are necessary to curb the emissions of air pollutants, thereby preventing or reducing the adverse impacts of air pollution on human lives and the environment.

## Programmes

- Malé Declaration on Control and Prevention of Air Pollution and its likely Transboundary Effects for South Asia
- Atmospheric Brown Cloud
- Acid Deposition Monitoring Network in East Asia (Supporting UNEP)

## Projects

- Air Quality Management Capacity Building
- USAID Clean Air (Nepal)

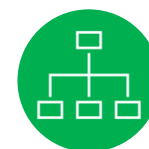

## We partner with

National Governments

Scientific Community

UN and International Organisations

NGOs & Other Stakeholders

## What we offer?

Support Inter-governmental Networks and Initiatives

Data and Information Management

Awareness Raising

Knowledge Building

Research and Assessment

Capacity Building

Science Policy Interface

Technical Support
