

Malé Declaration on control and prevention of trans-boundary air pollution and its likely trans-boundary effects for South Asia **3<sup>rd</sup> Training Workshop on “Emission Inventory, Scenarios and Modelling”**  
28 January to 1 February 2008, UNEP RRC.AP Bangkok, Thailand

**EMISSIONS INVENTORY NEEDS/PROGRESS QUESTIONNAIRE**

**Please complete and hand in this form to Harry by the end of this workshop** (electronic copy or hand-written)

1. Approximately, what percentage of your national 2000 inventory is complete at the moment?
2. Did you keep an inventory log book? [If not yet, please refer to Sri Lanka's exemplary log book to see how this should be done.]
3. How complete do you estimate your inventory will be by the end of this phase of the project (i.e. by end of April 2008) and who will be responsible for compiling the Inventory and log book?
4. When do you expect to have completed and submitted (to lyngara) your emission inventory (2000) report (deadline end April 2008)? [Please refer to Zimbabwe EI report as a guide to the approximate length, style and content required.]
5. Have you also started an inventory for 2005 – if so, how complete is it?
6. Do you intend to compile a 2005 inventory before the end of this phase?
7. How will your emissions inventory (EI) capability be institutionalized (to allow for continuous improvement and updating into the future)?
8. What EI capacity-building/training needs would you like to be met in any future phase of this programme (should it be funded)?
9. What capacity-building/training needs do you still have in other related areas (e.g. emission scenarios, atmospheric transfer modelling, trajectory analysis, integrated assessment modeling, effects/impacts modelling and so forth)?
